Avery Dennison ESG Reporting

Full Year 2021

The Sustainability Accounting Standards Board (SASB) categorizes Avery Dennison within its Containers & Packaging sub-sector under its Sustainable Industry Classification System (SICS).

Our packaging-related reportable segment, Label and Graphic Materials (LGM), represented 65% of our total 2021 sales. Our label materials enhance shelf appeal for brands, inform shoppers and improve operational supply chain efficiency. Our Graphics Solutions business is a global leader in self-adhesive and specialty media for professional graphics providers and designers.

Our Retail Branding and Information Solutions (RBIS) business represented 26% of our total 2021 sales. RBIS provides physical and digital labeling solutions that allow customers in the global apparel, food and general retail markets to optimize their on-product branding and engagement with consumers and enables item visibility and traceability from source to end-of-life. RBIS solutions include variable data labels, radio frequency identification (RFID) solutions, shelf-edge labels, tickets, tags, woven and fabric labels, heat transfers, software, printers and consumables.

Our Industrial and Healthcare Materials (IHM) businesses, which represented 9% of our total 2021 sales, provide highly engineered tape, adhesive and fastener solutions for industrial, automotive, building and construction, personal care and healthcare markets worldwide. We enable customers to enhance their products' performance and make their manufacturing processes more efficient.

We chose to include SASB sector standards from the Containers & Packaging, Apparel, Accessories & Footwear and certain relevant Chemical indicators.

Further discussion of our sustainability initiatives and progress against our sustainability goals can be found in our 2021 Integrated Report.

The sustainability data provided in this download is unaudited.

Scope

Unless specifically stated, this download covers acquired businesses owned for a full calendar year. Acquisitions made after the close of the fiscal year are excluded.

As a result of data unavailability, specific data points and indicators on certain topics only show partial-year data. In these cases, the time period will be clearly indicated, and the full year data will be provided after it becomes available.

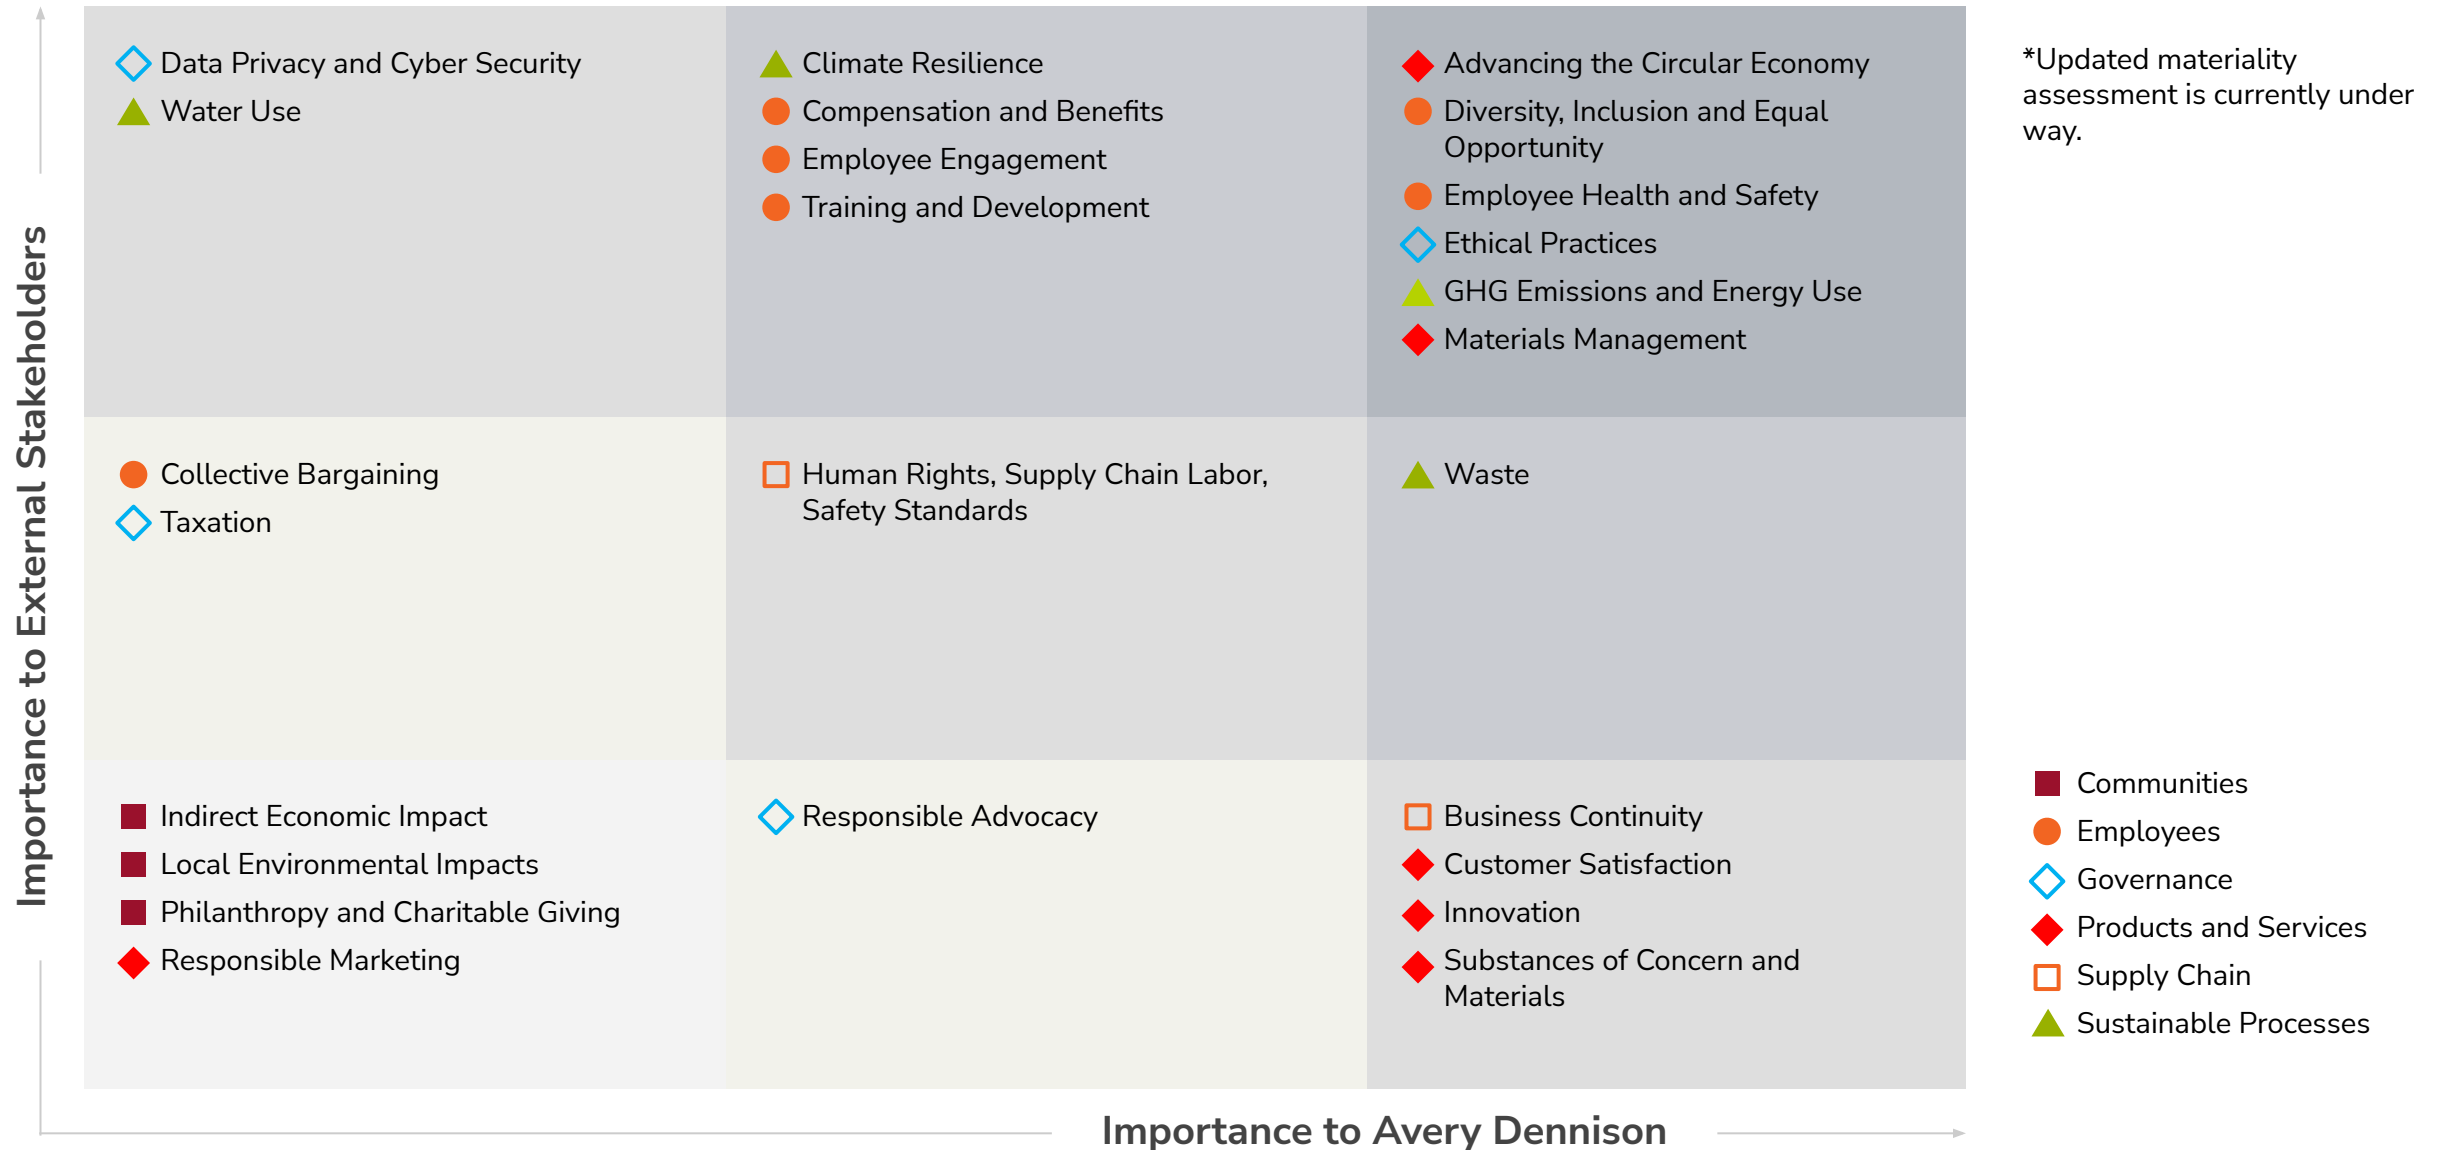

Definitions

Facility: We use the term “facility” to describe any location that we own or lease. This designation includes all locations, including manufacturing, converting/distribution centers, research and development, warehouses, fast response units and office locations.

Manufacturing Facility: We use the term “manufacturing facility” to describe any location in which we manufacture products. This designation excludes converting/distribution centers, research and development, warehouses, fast response units and offices locations.

Our 2025 Sustainability Goals

Full Year 2021

2025 Goals	Baseline (2015)	2021 Results
 <p>70% of revenues from sustainability-driven products</p>		<p>50% LGM 55% RBIS</p>
<p>3% absolute greenhouse gas (GHG) emissions reduction every year (26% cumulative by 2025)</p>		<p>50% cumulative GHG* emissions reduction</p>
 <p>100% certified paper 70% Forest Stewardship Council (FSC)-certified face paper</p> <p>95% landfill-free 75% waste recycled</p>	<p>45% FSC-certified</p> <p>90% landfill-free 55% recycled</p>	<p>91% certified* 81% FSC-certified face paper</p> <p>94% landfill-free* 66% recycled*</p>
<p>70% of films we buy conform to, or enable end products to conform to, our environmental and social guiding principles 70% of chemicals we buy conform to, or enable end products to conform to, our environmental and social guiding principles</p>		<p>97% of films 96% of chemicals</p>
<p>40% women in manager level and above</p>	<p>32%</p>	<p>35%</p>
 <p>Maintain world-class safety and employee engagement scores</p>	<p>0.31 Recordable Incident Rate (RIR) 80% engagement</p>	<p>0.21 RIR 82% engagement</p>
<p>Publicly commit to goals/report progress</p>		

*Goal progress is reported through Q4 2021, in prior disclosure progress was reported through Q3 2021.

Our 2030 Sustainability Goals

Full Year 2021

2030 Goals	Baseline (2015)	2021 Results
 <p>Deliver innovations that advance the circular economy</p> <p>Satisfy the recycling, composting or reuse requirements of all single-use consumer packaging and apparel with our products and solutions.</p> <p>RBIS 100% of our core product categories (printed fabric labels, woven labels, paper, interior heat-transfer labels, packaging and RFID) will meet our third-party verified Sustainable ADvantage™ standard.</p> <p>LGM 100% of our standard label products will contain recycled or renewable content. All of our regions will have labels that enable circularity of plastics.</p>	<p>--</p> <p>--</p>	<p>64% (RBIS Apparel only)</p> <p>50% (Percentage is of products that meet our Sustainable ADvantage™ criteria)</p>
 <p>Reduce our environmental impact in our operations and supply chain</p> <p>Reduce our Scope 1 and 2 GHG emissions by 70% from our 2015 baseline. Work with our supply chain to reduce our 2018 baseline Scope 3 GHG emissions by 30%***, with an ambition of net zero by 2050.</p> <p>Source 100% of paper fiber from certified sources focused on a deforestation-free future.</p> <p>Divert 95% of our waste away from landfills, with a minimum of 80% of our waste recycled and the remainder either reused, composted or sent to energy recovery.</p> <p>Deliver a 15% increase in water efficiency at our sites that are located in high or extremely high risk countries as identified in the World Resources Institute Aqueduct Tool.</p>	<p>--</p> <p>45% FSC-certified</p> <p>90% landfill-free 55% recycled</p> <p>--</p>	<p>50% Scope 1 and 2*</p> <p>Scope 3 tracking under development</p> <p>91% certified</p> <p>94% landfill-free* 66% recycled*</p> <p>Tracking in development</p>
 <p>Make a positive social impact by enhancing the livelihood of our people and communities</p> <p>Foster an engaged team and an inclusive workplace.</p> <ul style="list-style-type: none"> • Inclusion index: 85% • Employee engagement: 82% • Females in manager level or above positions: 40% • Safety: 0.2 Recordable Incident Rate (RIR) <p>Support the participation of our employees in Avery Dennison Foundation grants and foster the well-being of the communities in which we and our supply chain operate.</p>	<p>--</p> <p>80% 32% 0.31 RIR</p> <p>--</p>	<p>81% 82% 35% 0.21 RIR</p> <p>74% of countries in which we operate received a grant</p>

*Goal progress is reported through Q4 2021, in prior disclosure progress was reported through Q3 2021.

**Our 30% reduction by 2030 goal covers our purchased goods and services (GHGP category 1) and end of life treatment of sold products (GHGP category 12), as aligned with our SBTi target.

	Discussion	Source
Disclosures		
SASB	Our company is categorized as Containers and Packaging under the SICS classification system used by SASB. In this ESG Download, we also included SASB indicator codes for the Apparel, Accessories & Footwear, and certain relevant Chemical indicators.	
GRI	We published sustainability reports beginning in 2008 (moving to annual reporting with our first integrated financial and sustainability report for 2019) and have reported in accordance with GRI since 2010. In 2020, we transitioned from reporting GRI indexing in our Integrated Report to reporting in this ESG Download.	
CDP	We have responded to CDP Climate since 2010, and CDP Water and CDP Forests since 2015 and 2016, respectively. For 2020, the most recently rated year, we were rated B for Forests, Water and Climate.	CDP Responses
Science-Based Targets	Our approach is based on the 3% solution developed by the World Wildlife Fund, CDP and McKinsey & Company. In October 2021, our carbon emission reduction targets were approved by the Science Based Target Initiative (SBTi).	2030 Targets
UN Global Compact	In November 2020, we joined the UN Global Compact and first disclosed our progress on our annual commitments in November 2021.	Annual Reporting
Sustainable Development Goals	In November 2020, we made commitments to the UN Sustainable Development Goals and subsequently aligned our most material sustainability topics to focus within these 17 goals.	SDG Alignment
Sustainable Apparel Coalition	Our RBIS business has been a member of the Sustainable Apparel Coalition (SAC) since 2012, and we conduct HIGG Facility and Environmental Module (FEM) audits and Facility Social and Labor Module (FSLM) audits of RBIS manufacturing facilities. These audits are accessible in the HIGG index available to SAC members.	HIGG Index

*We continue to evaluate additional standards and frameworks as relevant.

Environment	SASB Reference	GRI Reference	2019	2020	2021	Discussion	Source
Climate Change							
Climate Change Policy						Sustainability is one of our company values as well as one of our core strategies. As a responsible corporate citizen, we are committed to reducing GHG emissions throughout our operations and value chain. In 2021, we received approval from the SBTi for our reduction targets, with our Scopes 1 and 2 targets in line with reductions required to keep warming to no more than 1.5°C. We also launched our 2030 sustainability goals, which include Scope 3 carbon reduction targets and an ambition to have net-zero emissions by 2050.	Climate Policy ESG Website
Board oversight of climate strategy						Board oversight over environmental sustainability is primarily conducted by the Governance Committee, which receives a report from management on sustainability topics at least once a year. The Committee is responsible for reviewing and providing oversight over key environmental sustainability initiatives, policies and programs, including our climate strategy.	Climate Policy CDP Climate Response (Section C1.1) Proxy Statement
Climate Change Strategy						Our 2025 goal is to achieve at least a 3% absolute reduction year over year, in line with the 3% Solution developed by the World Wildlife Foundation. In 2021, we announced our 2030 goals, which include a 70% absolute reduction against our 2015 baseline for Scope 1 and 2, and a 30% absolute Scope 3 reduction from purchased goods and services and end-of-life treatment of sold products against a 2018 baseline year. Our ambition is to have net-zero emissions by 2050.	2030 Targets

Environment	SASB Reference	GRI Reference	2019	2020	2021	Discussion	Source
Climate Change							
Climate change-related risks and opportunities						<p>Through our risk identification process, we evaluate climate risks as standalone risks and also as part of broader risks, such as the macroeconomic environment. One of the risks we consider as having a substantive impact is the risk of climate change and sustainability. Our process for identifying, assessing and responding to climate-related risks and opportunities is integrated into our Enterprise Risk Management (ERM) process. The teams leading our businesses have incorporated ERM into developing and executing their strategies, assessing the risks impacting their businesses, and identifying and implementing appropriate mitigation strategies on an ongoing basis. We are also currently undertaking a full update of our ESG materiality assessment.</p>	<p>CDP Climate Response (Section C3.3)</p> <p>Proxy Statement</p>
Incentives for management around climate change						<p>Our CEO's annual incentive award is in part based on the Talent and Compensation Committee evaluation of his performance against his predetermined strategic objectives for the year. One of these objectives is making progress toward our 2025 sustainability goals, including reducing GHG emissions. More information on incentive-based pay for all Named Executive Officers (NEOs) is available in our 2022 proxy statement.</p>	<p>CDP Climate Response (Section C1.3)</p> <p>Proxy Statement</p>
Internal price of carbon						<p>We are evaluating a price on carbon but have not instituted one at this time.</p>	<p>CDP Climate Response (Section C11.3)</p>

-------------	----------------	---------------	------	------	------	------------	--------

Greenhouse Gas Emissions							
Emission reduction activities						<p>The majority of our emission reduction activities come from renewable energy projects, which are applied across our global manufacturing footprint. Emission reductions have been achieved through a range of activities, including energy efficiency improvements, fuel switching to less emissions-intensive fuel sources, renewable electricity sourcing via on-site, owned solar, direct wind and solar power purchase agreements (PPAs), and procurement of renewable energy credits. Examples of our emission reduction activities are reported to CDP.</p> <p>In June 2020, our US virtual wind PPA with Plum Creek Wind came to fruition, and our off-take in 2020 was 62,224 megawatt hours (MWh). In 2021, its first full year of operation, our off-take from this 82-turbine, 230-MW project yielded 115,754 MWh of renewable power.</p>	<p>Climate Policy</p> <p>CDP Climate Response (Section C4.3a)</p>

Air Quality							
Air emissions of the following pollutants:							
(1) NOx (excluding N ₂ O)							
(2) SOx	RT-CP-120a.1	305-7					
(3) VOCs							
(4) PM							

Environment	SASB Reference	GRI Reference	2019	2020	2021	Discussion	Source
Energy Management							
Total energy consumed	RT-CP-130a.1	302-1	6,003K	5,952K	6,103K	Total energy consumption is measured in gigajoules (GJ). 2021 data excludes recent acquisitions (Vestcom, ACPO, JCD and ZippyYum). Data covers full calendar year 2021.	CDP Climate Response (Section C8.2a)
Percentage grid electricity	RT-CP-130a.1	302-2	36%	36%	37%	During 2021, 37% of our total energy consumption came from grid electricity. 2021 data excludes recent acquisitions (Vestcom, ACPO, JCD and ZippyYum). Data covers full calendar year 2021.	CDP Climate Response (Section C8.2a)
Percentage renewable	RT-CP-130a.1	302-3	14%	19%	21%	Our use of renewable energy is increasing due to our US wind virtual power purchase agreement (vPPA) that began in June 24, 2020. In 2021, this vPPA generated 115,754 MWh toward our operations. Data covers full calendar year 2021.	CDP Climate Response (Section C8.2a)
Total self-generated energy	RT-CP-130a.1	302-4				We self-generate less than 1% of our total energy consumption, primarily through backup diesel generators, in Scope 1. In addition, certain of our facilities operate windmills and solar panels that generate electricity for ourselves and the grid.	
Activities to reduce energy consumption		302-4				Within our overall strategy to reduce GHG emissions, we have a specific strategy and focus on initiatives and projects to address energy efficiency. To date, our facilities have completed 48 projects providing an estimated annual energy reduction of 15,066 MWh per year.	
Energy/Renewable energy targets						Our LGM and RBIS businesses have annual energy intensity reduction targets of 2% and 3%, respectively, measured as MWh of electricity and natural gas consumed per unit of production. As of 2021, our LGM business reduced the energy intensity of its manufacturing facilities by 22% compared to its 2015 baseline, an average reduction of 4% per year. Over the same period, our RBIS Apparel business reduced energy intensity by 33%, an average reduction of 5% per year. We are committed to reducing energy intensity in all of our facilities, consistent with our overall climate strategy.	

Environment	SASB Reference	GRI Reference	2019	2020	2021	Discussion	Source
Water Management							
(1) Total water withdrawn						Water withdrawal is measured in millions of gallons. We began collecting water consumption data in 2021 and plan to first report 2022 data in 2023. Water usage is relatively low in our direct operations; we see opportunities for larger water-saving impacts in our supply chain.	
(2) Total water consumed						The World Resources Institute (WRI) Aqueduct Tool allows us to determine by geography how many of our sites are in areas of water stress. We assess our sites annually and analyze the data based on risk level (Extremely High, High, Medium High, Medium Low, Low). A slight change in scope (excluding non-operational sites, combining sites that share a campus, etc.) contributed to the decrease in percentage from 2020 to 2021. This updated methodology will continue moving forward and be updated annually to reflect any closures or acquisitions.	Water Policy
(3) Percentage of each in regions with High or Extremely High Baseline Water Stress	RT-CP-140a.1	303-1	1) 540	1) 445 3) 48%	1) 417 3) 30%		
						2021 data excludes recent acquisitions (Vestcom, ACPO, JCD and ZippyYum). Data covers full calendar year 2021.	
Description of water management risks and discussion of strategies and practices to mitigate those risks	RT-CP-140a.2					We perform an annual water assessment using the WRI Aqueduct Tool. Based on recent assessments, any site falling into High or Extremely High risk becomes part of our 15% water efficiency target that is part of our 2030 sustainability goals. We are currently evaluating the impact our direct operations may have on the water basins in those areas, as well as the risk(s) to our business of utilizing water resources in these regions.	Water Policy
						Starting in 2021, we began requesting water policy and practice information through EcoVadis from suppliers representing the top 80% of LGM direct spend. At our own sites, we have been working to implement more accurate and specific tracking to enable data-driven water efficiency improvements in the future. We established our water-related target and goal to support our industry's efforts to reduce water-related impacts and risks in our value chain. The most relevant water-related risks to our business exist upstream in our supply chain, where water use is more significant.	
Number of incidents of non-compliance associated with water quality permits, standards and regulations	RT-CP-140a.3		1	0	1	In 2021, we had one incident of exceeding our discharge permit, which occurred at our Mill Hall, Pennsylvania facility. We exceeded the permit limit for molybdenum. The limit was 0.17 mg/liter, and our water discharge was found to contain 0.19 mg/liter. The sources were removed through product substitution. Subsequent sampling demonstrates consistent compliance with the molybdenum permit limit.	
Effluent Management Program						This treatment method consists of each facility sending its wastewater effluent to a public or community treatment facility to be properly treated. Once the wastewater arrives at the treatment facility, it is treated through physical, chemical and/or biological processes.	

Environment	SASB Reference	GRI Reference	2019	2020	2021	Discussion	Source
Hazardous Waste Management							
Hazardous waste						We have publicly committed to reducing waste as part of our sustainability goals. Our strategy and targets to reduce hazardous waste are included in our broader waste reduction plan.	Waste Reduction
Amount of hazardous waste generated; percentage recycled	RT-CP-150a.1	306-2	18K 23%	16K 23%	17K 22%	<p>By 2030, we plan to divert 95% of our waste from landfills, with a minimum of 80% waste recycled and the remainder either reused, composted or sent to energy recovery.</p> <p>Chemical waste and contaminated materials must be handled in accordance with Global Standard 3.01-Waste Management.</p> <p>Hazardous waste is measured in metric tons (t) and by percentage recycled.</p> <p>2021 data excludes recent acquisitions (Vestcom, ACPO, JCD and ZippyYum). Data covers full calendar year 2021.</p>	Waste Reduction

Environment	SASB Reference	GRI Reference	2019	2020	2021	Discussion	Source
Waste Management							
Percentage of waste diverted from landfill		306-3	94%	94%	94%		
Percentage of waste sent to landfills		306-2	5.7%	5.7%	5.6%	By 2030, we plan to divert 95% of our waste from landfills, with a minimum of 80% waste recycled and the remainder either reused, composted or sent to energy recovery. 2021 data excludes recent acquisitions (Vestcom, ACPO, JCD and ZippyYum). Data covers full calendar year 2021.	
Percentage of waste recycled			65%	66%	66%		
Provide data on significant spills			24	15	16	Defined as release to the environment (air, water, earth) where the quantity (a) exceeds 5 gallons/20 liters, (b) exceeds a Reportable Quantity in the US or (c) which requires notification to a governing agency (excluding water). Most of these spills occurred inside a building and were contained and cleaned with little or no impact to the environment.

Environmental Impacts in the Supply Chain							
Percentage of (1) Tier 1 supplier facilities and (2) supplier facilities beyond Tier 1 in compliance with wastewater discharge permits and/or contractual agreement	CG-AA-430a.1		1) 100%	1) 100%	1) 100%	<p>Our RBIS business joined the SAC in 2012 as the first solutions provider in the network. Based on SAC criteria, we consider our manufacturing facilities to be Tier 1 factories.</p> <p>In 2019, we implemented a full manufacturing restricted substance list (M-RSL) according to the Zero Discharge of Hazardous Chemicals (ZDHC) Program’s restricted substance list. We require suppliers to comply with the M-RSL requirement, which restricts harmful substances and chemicals used in our manufacturing facilities. We do not currently track wastewater compliance of suppliers.</p> <p>We monitor wastewater quality at owned manufacturing facilities. As of December 31, 2021, 100% of our manufacturing facilities complied with wastewater discharge permits and/or contractual agreements. We conduct regular tests according to ZDHC wastewater guidelines. We disclose results from three key manufacturing facilities on public platforms including ZDHC Gateway and the Institute of Public and Environmental Affairs (IPE). In 2021, these three manufacturing facilities produced approximately 45% of RBIS Apparel’s global product.</p>	RBIS RSL
Percentage of (1) Tier 1 supplier facilities, and (2) supplier facilities beyond Tier 1 that have completed the Sustainable Apparel Coalition’s HIGG FEM assessment or an equivalent environmental data assessment.	CG-AA-430a.2			1) 61%	1) 64%	<p>In 2021, RBIS Apparel conducted 18 HIGG FEM audits, which validated 2020 data, covering 64% of its manufacturing facilities.</p> <p>RBIS is piloting the use of HIGG FEM audits into the supply chain with key outsource partners. There were 19 key outsource partners that completed HIGG FEM self-assessments in 2021.</p>	

Social Capital	SASB Reference	GRI Reference	2019	2020	2021	Discussion	Source
Human Rights							
Human Rights Policy						<p>We address human rights concerns regarding our operations and supply chain through our corporate policies, including the Avery Dennison Human Rights Policy. Within our RBIS business, all manufacturing locations and Tier 1 suppliers are regularly audited against our social standards. In 2021, the 195 social audits of our owned locations covered 22,145 employees. We also conducted 284 social audits of our suppliers in 2021.</p> <p>In 2021, we achieved full membership of the Ethical Trading Initiative, and, in early 2022, we were recognized as a great place to work by the Human Rights Campaign, achieving a perfect score on their corporate equality index.</p>	Human Rights Policy
Human Rights or other policy covers community consultations and indigenous rights						<p>In 2021, we published our Responsible Sourcing Policy, which includes requirements related to labor rights as well as prohibitions on endangered animal and plant material, and responsible forestry and animal practices.</p> <p>As a significant stakeholder in the supply chain of pulp and paper products, we recognize our important role and opportunity in promoting and providing sustainable and socially responsible paper products. Wood fiber is not harvested in violation of internationally accepted guidelines and treaties to protect human rights of indigenous peoples. Our Human Rights Policy outlines our commitments to human rights within our supply chain.</p> <p>We have been closely following the requirements of the Uyghur Forced Labor Prevention Act (UFLPA). We assessed risk and completed due diligence where we believed it to be applicable.</p>	Responsible Paper Procurement Policy RBIS Responsible Sourcing Policy
Policy Against Child Labor						<p>We do not use, and we prohibit our suppliers from using, child labor. The term “child” refers to a person younger than 15 or the local legal minimum age for employment, whichever is higher. Our Human Rights Policy outlines our commitments, and our Social Compliance Supplementary Manual discusses conditions for juvenile workers and required actions if an instance of child labor is discovered.</p>	Supplier Standards Human Rights Policy

Social Capital	SASB Reference	GRI Reference	2019	2020	2021	Discussion
Product Safety						
Strategy to (1) manage chemicals of concern and (2) develop alternatives with reduced human and/or environmental impact	RT-CH-410b.2					<p>We implemented restricted substance list (RSL) programs both company-wide and tailored to our businesses. These programs list chemicals of concern identified by governments, NGOs and customers that are banned or restricted depending on risk. In addition, we maintain a watch list of chemicals that must undergo a rigorous alternatives assessment and be approved by a committee of technical leaders prior to their use in new products.</p> <p>Our RBIS and Avery Dennison Smartrac businesses maintain their own RSL programs, which restrict many more chemicals of concern relevant to the apparel and footwear industry and RFID-enabled products in both existing and new products. For LGM and IHM, we use our company-wide RSL, which identifies banned, restricted and watch-list substances. Our banned substances are those which are banned by law or regulation somewhere in the world, while our restricted list allows use in some instances while not in others. Our 2025 sustainability goal of 100% compliance with the RSL will mean no use of any substance on the banned substance list, even in jurisdictions where it is still allowed.</p>
Discussion of processes to maintain compliance with restricted substance regulations	CG-AA-250a.1					<p>Our product compliance teams, in each business unit and at the corporate level, regularly monitor regulations and other developments applicable to our products through subscriptions to different government agencies such as EUROPA / CPSC, industry groups, and third-party regulatory and chemical tracking and management service providers. Affected stakeholders in our company are notified when relevant new developments occur so that appropriate actions can be taken.</p>
Discussion of processes to assess and manage risks and/or hazards associated with chemicals in products	CG-AA-250a.2					<p>We implemented RSL programs company-wide and within our businesses that identify and restrict chemicals of concern. To assess and manage risks from these chemicals, we work with our suppliers and product development teams to identify and reduce chemicals of concern wherever feasible in our products. We also implemented an assessment and approval process to minimize or avoid chemicals of concern in new products.</p> <p>Our RBIS business maintains an RSL encompassing additional legal requirements from regulations (REACH, CPSIA, RoHS, Cal Prop 65), industry standards (Oeko-tex, ZDHC MRSL, AAFA RSL, AFIRM RSL) and customer standards in the apparel and footwear industry. RBIS requires all suppliers to certify that materials they supply to us meet the RBIS RSL requirements. RBIS conducts over 2,200 tests of raw materials and products to confirm compliance with its RSL. Avery Dennison Smartrac also maintains an RSL relevant to RFID-enabled products to identify and restrict chemicals of concern.</p>
Number of recalls issued Totals units recalled	RT-CP-250a.1		0 0	0 0	0 0	We issued no product recalls from 2019 to 2021.
Discussion of process to identify and manage emerging materials and chemicals of concern	RT-CP-250a.2					<p>We implemented a Regulatory Early Warning System that uses a comprehensive approach to identify and track developments globally in product and chemical regulations, safety and environmental impacts. This system tracks issues regarding emerging and ongoing chemicals of concern and their use in products and manufacturing, as well as notification of affected stakeholders in our company to allow early and effective response and management of issues.</p>

Supply Chain Management							
Sustainable Supplier Guidelines		308-1 414-1				<p>Our Supplier Standards describe standards with which our suppliers are required to comply on matters such as working conditions, labor standards, anti-corruption and other legal and ethical requirements. These standards underscore our commitment to integrity in business activities, abiding by government laws and regulations, providing employees with a safe and healthy working environment, treating employees with dignity and respect, and promoting sustainable practices to help protect and preserve the environment. Compliance with these standards is an ongoing condition of doing business with our company.</p> <p>Additionally, our RBIS business provides suppliers with Social Compliance Supplementary Standards.</p> <p>Both documents address key environmental and social issues in our supply chain. Suppliers and subcontractors must comply with all applicable environmental laws and ensure that other relevant requirements are achieved. Suppliers, contractors and subcontractors must take proactive measures to protect, and minimize impacts to, the environment.</p> <p>Both documents also communicate our expectations regarding compensation, working hours, forced labor, child labor, discrimination and human rights, and freedom of association.</p>	<p>Supplier Standards</p> <p>Social Compliance Supplemental Standards</p> <p>RBIS Responsible Sourcing Policy</p>
Evaluation of suppliers on social and environmental risks and performance		408-1 409-1				<p>Within our LGM and IHM businesses, we use EcoVadis to conduct annual social, environmental and ethical performance of their top-tier suppliers. The assessment produces an overall rating for each supplier, as well as a performance rating within the categories of Environment, Labor & Human Rights, Ethics and Sustainable Procurement. The report also highlights opportunities for improvement and includes news alerts with any emerging controversies. We also began benchmarking supplier emissions performance through CDP Supply Chain in 2021.</p> <p>In RBIS, all new outsource partners are audited prior to any orders being placed. These audits are conducted by third-party organizations and focus on a number of social, environmental, and health and safety criteria. Each supplier receives an audit score and must develop a corrective action plan for identified areas of improvement. This audit process replicates the standards and protocols of many external benchmarks, such as SEDEX and BCSI, and covers many areas, including the social and environmental controls and systems. Before a supplier can be onboarded, it must pass this audit process.</p>
